

Chapter 3 Generative Models

Siheng Zhang
zhangsiheng@cvte.com

September 11, 2020

This part corresponds to **Chapter 24, 31 in UML, Chapter ? in PRML, Chapter ? in PGM**, and mainly answers the following questions:

-
-

Contents

1 Naive Bayes	2
2 Density estimation	2
2.1 Parametric methods	2
2.2 Non-parametric methods	2
3 Bayesian Reasoning	2
4 PAC-Bayes	2
5 Generative models	2
5.1 GMM (Gaussian mixture models)	2
5.2 HMM (Hidden Markov models)	2
5.3 <i>v.s.</i> discriminant models	2
5.4 Naive Bayes to linear discriminant models	2
6 Exercises and solutions	2

- 1 Naive Bayes**
- 2 Density estimation**
 - 2.1 Parametric methods**
 - 2.2 Non-parametric methods**
- 3 Bayesian Reasoning**
- 4 PAC-Bayes**
- 5 Generative models**
 - 5.1 GMM (Gaussian mixture models)**
 - 5.2 HMM (Hidden Markov models)**
 - 5.3 *v.s.* discriminant models**
 - 5.4 Naive Bayes to linear discriminant models**
- 6 Exercises and solutions**

Chapter 4. Linear models, perceptron, MLP, deep learning, Generalization bounds on deep learning.
